ACCN update

Last meeting held in Dec 2016 (Birmingham).

The ACCN continues to act as the reference group for the CYP safe and sustainable staffing workstream chaired by Michelle McLoughlin.

CYP Nurse managers have taken part in telephone interview about tools used and quality data that is captured. John Courtney (Independent consultant) has been interviewing nurse managers, asking what tools are used and what is already out there. At the previous meeting the ACCN looked at what quality indicators are used and as staffing and quality are linked.

Keith Hirst (NHSI) was asked to do a literature review as group wanted to base the work on an academic background and recommendations.

Presentation from Dr Kerry Jones on CYP safe staffing work to date at last meeting.

Next meeting 3 March 2017 (Manchester)
